Weekly Coal Production

Production for Week Ended:
November 14, 1992

Energy
Information
Administration

Summary

U.S. coal production in the week ended November 14, 1992, as estimated by the Energy Information Administration from railroad car loadings, totaled 20 million short tons. This was 7 percent higher than in the previous week and about the same as in the comparable week in 1991.

Production east of the Mississippi River totaled 12 million short tons, and production west of the Mississippi River totaled 8 million short tons.
